

**Literature Review Assignments and Topic Links**

The listing below shows the topic and the student to whom it is assigned. Please pick **five** recent papers on this topic and write a review. The review should give a reasonable picture of what is going on in the field; thus, *follow links from these papers to communicate additional results wherever necessary*. In summary, the five papers should form the anchor of your review, but a good review will also pull in additional material to highlight ongoing efforts in that area.

**(Grad) Literature Review Topic Assignments:**

- Astroseismology of high mass stars with space telescopes: **Penny**
- Neutron Stars: **Nate**
- Gamma Ray Bursts (long duration only; connection to core-collapse supernovae): **Priyanka**
- Stellar mass Black Holes: **Jimmy**
- Stellar Rotation: **Tim**
